Summary of Invention Paragraph (57):

[0052] The anionic stabilizer used in the present invention can be present on either the isocyanate component or the polyol component. Typically, and most conveniently, the anionic stabilizer is present as the polyol component. The anionic group can be sulfonate, phosphonate, phosphate, and carboxylate but is preferably either sulfonate or carboxylate and most preferably a sulfonate. The most preferred sulfonates are the sulfonated polyols described in U.S. Pat. No. 4,738,992 (Larson et al.). Particularly preferred sulfonates are polyesterdiols having the following structure: 1

[57] ABSTRACT

A composition in the form of pellets comprising a thermo-
plastic and wood fiber composite material suitable for form-
ing structural members as a replacement for wood in the
manufacture of doors and windows. The composite has less
than about 10 wt % water based on pellet weight and a
Young's modulus of at least about 500,000. Structural
members are typically formed from the composite in an
extrusion or an injection molding process.

Brief Summary Text (48):

The anionic stabilizer used in the present invention can be present on either the isocyanate component or the polyol component. Typically, and most conveniently, the anionic stabilizer is present as the polyol component. The anionic group can be sulfonate, phosphonate, phosphate, and carboxylate but is preferably either sulfonate or carboxylate and most preferably a sulfonate. The most preferred sulfonates are the sulfonated polyols described in U.S. Pat. No. 4,738,992 (Larson et al.). Particularly preferred sulfonates are polyesterdiols having the following structure: ##STR1##

Additional Important Information

- COTRs and Task Managers are responsible for ensuring that all contractors using computers and systems on the USPTO network complete this training.
- The Office of the Chief Information Officer (OCIO) IT Security Program Office (ITSPO) staff is supporting this activity and will help resolve problems encountered while taking the training. You can contact them via e-mail at learningcenter@uspto.gov.
- You may take the post-assessment as many times as you like within the allotted hour for training, however, only one completion of the assessment is necessary for course completion. Select "Start next assessment" to take another assessment. Please note that the questions in each assessment are slightly different.
- If you have technical problems viewing or completing the course materials please contact the E-Learning Center Technical Help Desk by clicking on the "?" or "Help." If you have questions on the course content please e-mail the USPTO Learning Center staff at learningcenter@uspto.gov. ITSPO staff will receive, respond to, and keep track of e-mail sent to the Learning Center mailbox.
- For more information on IT Security at USPTO and the IT Security Awareness Training, view the following internal websites:
 - [IT Security Training and the IT Security Training Policy](#)
 - [IT Security Training Frequently Asked Questions](#)
 - [USPTO IT Security Program and the USPTO IT Security Policy](#)
- USPTO Business Unit Heads and Points-of-Contact (POCs) will be notified weekly on the status of the IT Security Awareness Training completion in their office. Throughout August, they will receive the names of those in their office that have not yet completed the training. The USPTO IT Security Training Policy covers procedures to handle cases where employees do not complete annual IT Security User Awareness Training.

As USPTO system users, you are our first line of defense against the growing threats to our systems and the valuable information that has been entrusted to us. IT Security Awareness Training will help strengthen that defense.

Please follow the IT security guidance in the course each day. Thank you very much for helping us protect your work, USPTO IT resources, and our valuable customer information.
